CYCLES . USA

\$2,579.00 MSRP (USD) Frameset Only w/Fox Kashima RP23

About INTENSE Cycles:

INTENSE Cycles of California, designs and manufactures high end mountain bikes for the global market for discerning customers in World Cup Downhill and Cross-Country racing, to Dirt Jumping and weekend warriors. In addition to the 'Made in U.S.A' Aluminum frames, INTENSE is now producing high tech, Carbon Fiber frames. To do this properly we employed the services of SEED engineering. The brains behind SEED comes from years of experience in the Carbon Fiber manufacturing world. "We use all the great technology there is, but especially keep focus on providing the best product".

Utilizing Jeff Steber's design skills, we ended up with the most beautiful, efficient, and effective suspension bike. This bike is proving to be the best 'All Around' bike we ever built. The Carbine is the first of the Carbon bikes from INTENSE, complimenting the Aluminum line up of bikes, including the M9 FRO, 951, Slope Style 2, Uzzl VP, Tracer 2, Tracer 29, Spider 29, Spider, Tazer VP and Tazer HT.
